Procurato

Carbon Reduction Plan

Supplier name: Procurato Ltd

Publication date: 6th November

Commitment to achieving net zero Procurato Ltd is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 1 December 2023 to 30 November 2024	
Additional details relating to the baseline emissions calculations:	
The baseline year was selected because Procurato had not previously reported its emissions. All Scope 1 and Scope 2 emissions were calculated, together with the Scope 3 emissions required by the reporting standard: upstream and downstream transportation and distribution, waste generated in operations, business travel and employee commuting. The baseline was prepared under PPN 06/21, which PPN 006 has replaced without changing these requirements.	
Baseline year emissions:	
Emissions	Total (tCO2e)
Scope 1	0.00
Scope 2	7.24
Scope 3 (included sources)	6.48
Total emissions	13.72

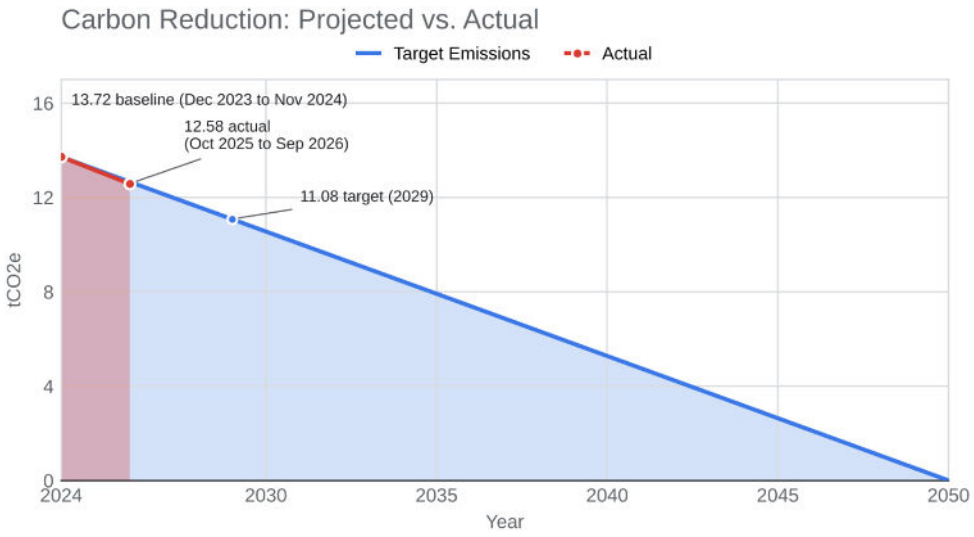

Current emissions reporting

Reporting year: 1 October 2025 to 30 September 2026	
Emissions	TOTAL (tCO2e)
Scope 1	0.00
Scope 2	6.73
Scope 3 (included sources)	5.85
Total emissions	12.58

Emissions reduction targets

In order to continue our progress toward net zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease to 11.08 tCO2e by 2029. This is a reduction of 19% against the baseline.

The graph below shows our target emissions:

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2023/24 baseline. The carbon emission reduction achieved by these schemes has not been quantified separately, and the measures will be in effect when performing the contract.

- **Waste:** working with our building management, food waste is now sent to anaerobic digestion, and the share of office waste recycled or digested has risen from 63% to 71%, with no waste sent to landfill.
- **Building controls:** comfort cooling has been reprogrammed to respond to occupancy, and lighting sensors have been adjusted in line with occupational use.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- **Improve heating practices for remote working:** encourage staff to heat only the rooms they work in, and to the minimum comfortable temperature for working.
- **Promote more efficient electricity use for remote working:** encourage staff to use energy-saving products, switch devices off at the mains to reduce standby power, and activate energy-saving modes.

- **Encourage better travel practices:** encourage staff to reduce their use of taxis and to walk, cycle or use trains where possible.
- **Continue to work with our building management:** support the planned removal of the central gas hot water plant, now expected in 2028.
- **Improve the quality of our data:** record business travel by distance and mode, and run an annual staff commuting survey.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Procurato Ltd:

Matthew Parker, Managing Director
